

## The Contestable and Potentially Harmful Conclusions of the 'Microsoft' Case

By Veronica Hagenfeldt

GRIN Verlag Apr 2011, 2011. Taschenbuch. Book Condition: Neu. 210x148x4 mm. This item is printed on demand - Print on Demand Neuware - Master's Thesis from the year 2009 in the subject Law - Media, Multimedia Law, Copyright, grade: Distinction, University of Edinburgh (School of Law), course: Master Thesis in the LLM in European Law Programme, language: English, comment: This Thesis was the recipient of the Sir David Edward Prize for academic excellence for the best dissertation in the LLM in European Law programme 2008/2009. , abstract: In what has been described as the most important competition law case in EU history the CFI upheld the Commission's finding that Microsoft was guilty of committing two infringements of EC competition law: illegitimately to have refused to supply intellectual property (IP) protected interoperability information to competing workgroup server operating systems (WGSOS), and to have performed an illegal tie of its Windows Media Player (WMP) to its dominant operating system. Microsoft has been labelled 'the biggest encroachment on intellectual property in European competition law history' and it is accused of hampering innovation and interfering with beneficial product integration by applying an anachronistic form-based tying test. In the opinion of the author the Judgment...
