

Color Atlas of Forensic Pathology (Hardback)

By Jay Dix

Taylor Francis Inc, United States, 2000. Hardback. Book Condition: New. New.. 279 x 221 mm. Language: English . Brand New Book. A male homicide victim with a shotgun blast to the chest. A female drug addict who has overdosed on crack cocaine. An elderly woman with deep stab wounds to the neck. A two-year-old motor vehicle accident victim with blunt head trauma. For forensic pathologists, police detectives, and crime scene investigators, dealing with death and injury is a daily routine. But even after investigating thousands of drownings, shootings, stabbings, electrocutions, overdoses, and traffic accidents, most professionals in the investigative fields still haven't seen it all. Originally published on CD-ROM, the Color Atlas of Forensic Pathology addresses much of the basic information which forensic pathologists and other investigators deal with on a day to day basis. Packed with 780 full-color, captioned photographs, this atlas examines everything from time of death and decomposition, to identification, to causes of death from blunt trauma, firearm injuries, asphyxia, cutting and stabbing injuries, and more. The atlas shows the various causes of death and injury with case -- visuals to help investigators understand the work they perform. Indeed, with its exhaustive coverage, the Color Atlas...
