Date :2008-09. Thermal Engineering theoretical basis for the general higher education Eleventh Five-Year national planning materials (higher vocational education). The book is divided into two, namely, engineering thermodynamics and heat transfer. Engineering Thermodynamics main contents include: thermodynamics first, the second law of thermodynamic properties of gas and heat process, water vapor, wet air, power cycle, thermal cycle; heat transfer include the following: heat conduction, convection, thermal radiation, quality exchange. Thermal theory-based with the characteristics of vocational education, vocational tightly around the application-oriented training objectives written. In the preparation process-oriented theory with practice, emphasizing the application and follow the laws of cognition, selection of content. Materials to fully reflect the applied, practical, comprehensive, advanced principle. Thermal theory-based as vocational heating ventilation and air conditioning engineering materials, correspondence and the Self can be used as resource materials, but also relevant professional engineering and technical personnel as a reference book. Contents: Introduction First Edition Preface

Reviews

This ebook is wonderful. I have got go through and so i am certain that i am going to likely to read through once again again later on. You will like the way the article writer compose this ebook.
