

A Mathematical Tapestry: Demonstrating the Beautiful Unity of Mathematics (Hardback)

By Peter Hilton, Jean Pedersen

CAMBRIDGE UNIVERSITY PRESS, United Kingdom, 2011.
Hardback. Book Condition: New. Sylvie Donmoyer (illustrator).
249 x 178 mm. Language: English . Brand New Book ***** Print
on Demand *****.This easy-to-read 2010 book demonstrates how
a simple geometric idea reveals fascinating connections and
results in number theory, the mathematics of polyhedra,
combinatorial geometry, and group theory. Using a systematic
paper-folding procedure it is possible to construct a regular
polygon with any number of sides. This remarkable algorithm
has led to interesting proofs of certain results in number theory,
has been used to answer combinatorial questions involving
partitions of space, and has enabled the authors to obtain the
formula for the volume of a regular tetrahedron in around three
steps, using nothing more complicated than basic arithmetic
and the most elementary plane geometry. All of these ideas, and
more, reveal the beauty of mathematics and the
interconnectedness of its various branches. Detailed instructions,
including clear illustrations, enable the reader to gain hands-on
experience constructing these models and to discover for
themselves the patterns and relationships they unearth.
